

Why Use Activate™ PMSLA?

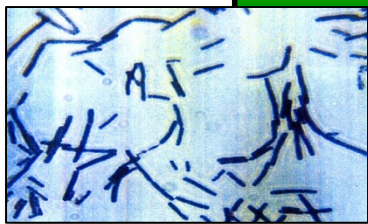

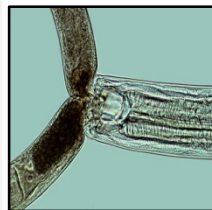

- Guaranteed species analysis (**100 Billion CFU/gram**)
- Naturally occurring organisms, not GMO
- Nutrient recycling and stubble digestion
- Stimulation of root growth
- Reduction in nitrogen use
- Symbiotic relationship with mycorrhizae and other beneficial fungal organisms

Microbial diversity is built on a base of bacteria

Activate™ PMSLA promotes:

- Free living nematodes
 - Humus formation
 - Active fungal length
 - Active fungal biomass
 - Predatory nematodes
- Total bacterial biomass
- Nitrogen fixing organisms

How to use Activate™ PMSLA:

In soils, potting mixes, dry and liquid fertilizer blends, as a seed coating, as a transplant drench, in manure lagoons, as a pond water clarifier, as compost tea inoculant, through irrigation water, as a stubble digester, hydrocarbon detoxifier, or as a compost starter.
