

ProGibb® PGR – For Improved Fruit Size, Quality & Harvest Management of Sweet Cherry

ProGibb® Plant Growth Regulator is proven to increase fruit size, maintain fruit firmness and provide better quality fruit at harvest. *ProGibb* can also be used to stagger harvests, allowing for better labor management and more efficient harvests.

Size It Up with *ProGibb*!

Over 50% of the quality score of packed sweet cherries is attributed to size and firmness

ProGibb maximizes the genetic potential of cherry fruit providing increased size while maintaining firmness

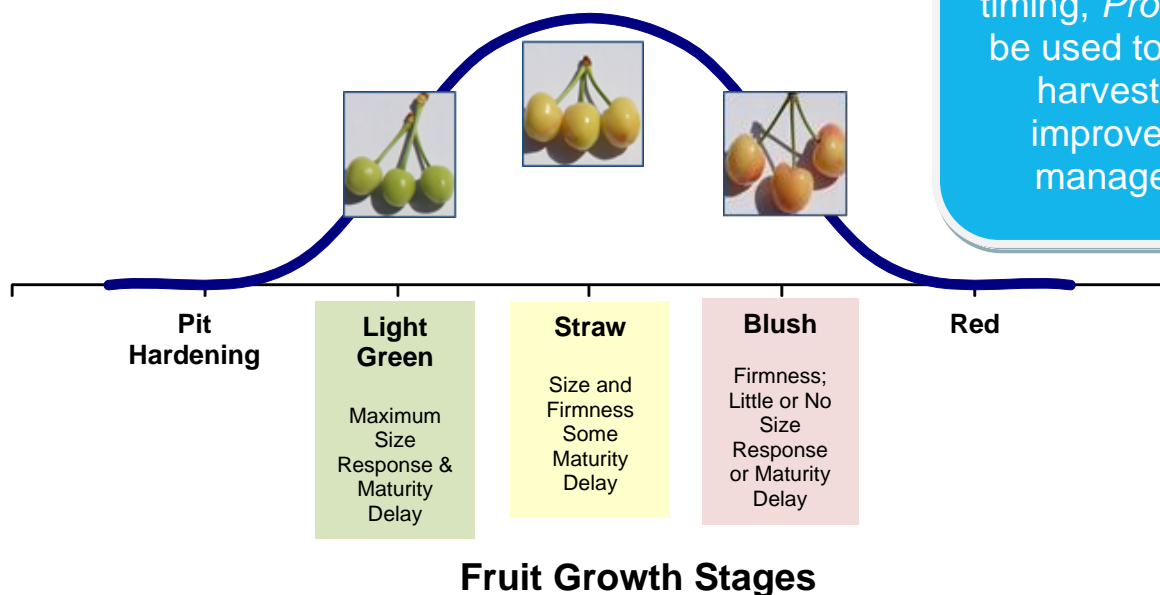

How To Use *ProGibb*

Rate for <i>ProGibb</i> 40%	1.4 – 4.3 ounces product per acre (16 – 48 grams active ingredient)
Rate for <i>ProGibb</i> 4%	16.0 – 48.0 fl oz product per acre (16 – 48 grams active ingredient)
Method	Ground sprayer
Spray volume	100 – 400 Gal/A
Adjuvant	Use of a non-ionic surfactant can improve coverage; do not use an organosilicone surfactant with <i>ProGibb</i> on cherry

Application Timing

If fruit maturity is even	Make a single application when fruit is light green to straw color.
If fruit maturity is uneven	Make two applications using 1/3 to 1/2 of the desired amount of product when early fruit is translucent green. Apply the remaining material when the majority of the fruit is straw to early blush stage.

Relative Efficacy of *ProGibb*

Depending on rate and application timing, *ProGibb* can be used to stagger harvests and improve labor management

Other Important Information

- Thorough, uniform coverage is essential
- Adjust rate depending on crop load, market timing, and variety
- Apply under slow drying conditions for best absorption and performance
- Delays maturity; especially at higher doses and early applications
- 4-hour REI, no PHI requirement
- Compatible with RainGard®, SWD insecticides and fungicides.
