

Improve Crop and Fruit Quality and Increase Market Value

ProGibb® Plant Growth Regulator is used in many crops to improve crop quality and value. In seedless table grapes, *ProGibb* enlarges the cluster, thins excessive fruit and increases berry size. In citrus, *ProGibb* maintains the quality of the rind, extending the harvest period. *ProGibb* is also used to improve the market value of sweet and sour cherries, blueberries, and a number of other fruits and vegetables.
