

MycoApply® EndoMaxx: Building Better Crop Performance

MycoApply® EndoMaxx contains four species of mycorrhizae fungi that colonize a plant's root system to promote optimal plant health, performance and yield.

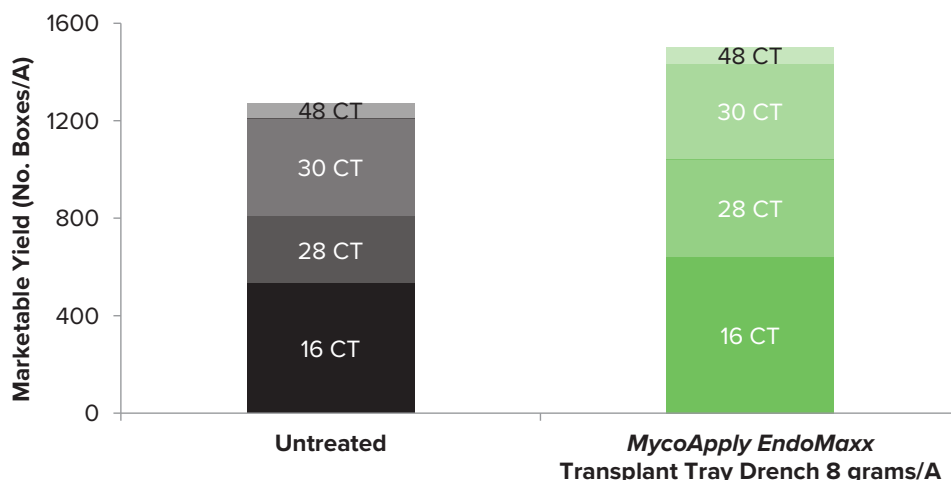

- ▶ **Root mass expansion**—Expands vascular network beyond roots and into soil by up to 50 times
- ▶ **Nutrient efficiency**—Absorbs and transports soil nutrients directly to the root including tightly-bound nutrients such as phosphorus and micronutrients
- ▶ **Drought tolerance**—Stores resources until needed by the plant and improves water availability and transport
- ▶ **OMRI listed and NOP compliant to fit both organic and sustainable production**

Increased Celery Yield and 16-Count Boxes

Celery transplants treated with *MycoApply EndoMaxx* in the transplant tray water resulted in 18% higher total marketable yield and a 21% increase in the number of 16-count boxes versus the untreated control.

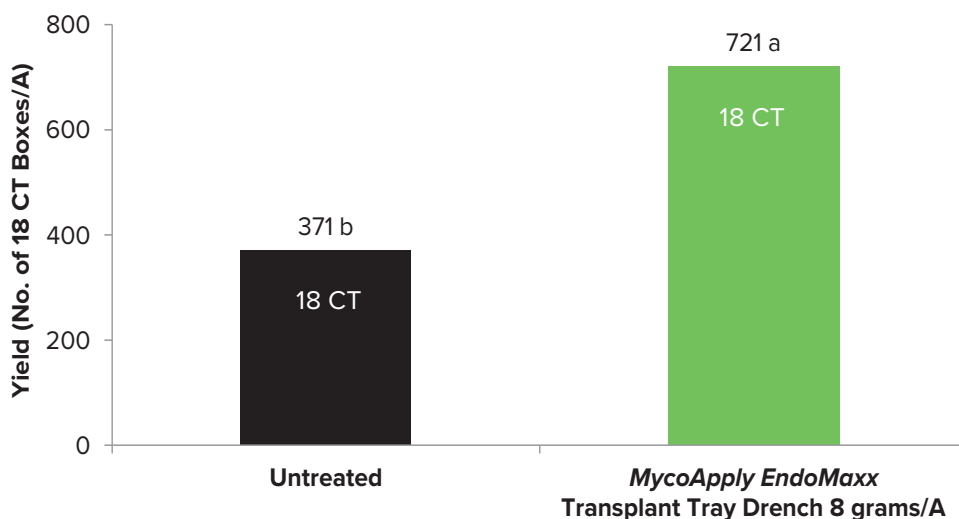

Source: Commercial grower trial, Yuma, AZ

Increased Celery Pack-Out of 18-Count Boxes

An application of *MycoApply EndoMaxx* as a transplant tray drench increased the number of 18-count boxes per acre by almost twice that observed in the untreated control.

Source: Commercial grower trial, Yuma, AZ

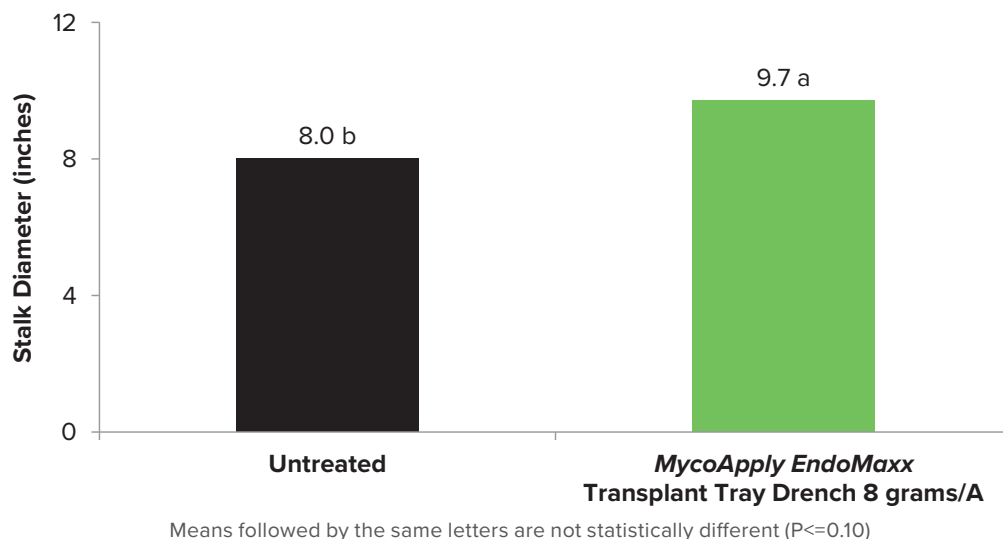

Means followed by the same letters are not statistically different ($P \leq 0.10$)

Increased in Celery Stalk Diameter

Celery transplants treated with 8 grams/A of *MycoApply EndoMaxx* as a transplant tray drench 7–10 days prior to transplanting resulted in a 21% increase in stalk diameter versus the untreated control.

Source: Commercial grower trial, Yuma, AZ

Use of *MycoApply EndoMaxx* as a transplant tray drench resulted in taller celery plants with larger stalk diameters and increased trimmed stalk weight versus the untreated control.

Source: Commercial grower trial, Yuma, AZ

How To Use

Planting Rate / Use Rate	30,000–45,000 plants/A	8–10 grams/A
Application Method	<ul style="list-style-type: none"> Pre-plant tray drench At-plant transplant water 	
Mixing	Pre-slurry is recommended	
Pack Size	10 x 160-gram pouches per case, with measuring scoops
