

MV SOLUBLE POWDER

SOIL AMENDMENT

CONTAINS NON-PLANT FOOD INGREDIENTS

80.0%* Total Humic Acids (HA)

*Determined using the Colorimetric Method

Application Rates:

• Foliar application 1-2 lbs./ac. 2-3 times per growing season is recommended for row crops and forages. • For forages which are cut more than once per year; a foliar treatment of 1-2 lbs./ac. in the spring after each cutting should occur when the plants have grown back to cover 1/4 to 1/3 of the ground (alfalfa, clovers), or when grasses reach about 7 cm in height. • For ornamentals and high cash value vegetable crops, foliar treatment of 1-2 lbs./ac. at intervals from 2-4 weeks are effective. • For lawns, a treatment every 4-8 weeks is recommended (3-6 ozs. powder / 1,000 sq. ft.) diluted up to 40 times for coverage.

• Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>.

Net Weight:

25 kg., 55 lbs.

Application Rate:

1-2 lbs. per acre for most crops
