To whom it may concern:

Perma-Guard products **Fossil Shell Flour Anti-caking, Crawling Insect Control, and Grain and Seed Storage Insecticide D-10** are 100% Diatomaceous earth. They do not contain any added ingredients. The only difference in the above named products is the wording on the labels.

**Perma-Guard** Diatomaceous Earth is composed of SiO2 (Silicon DiOxide), trace minerals (which naturally occur within the Diatomaceous earth) and moisture. It is free of any of the allergens or drugs listed below and is not manufactured in a facility used to process any of the following:

- |                      |                    |
|----------------------|--------------------|
| Milk                 | Wheat              |
| Eggs                 | Peanuts            |
| Fish                 | Soybeans           |
| Crustacean shellfish | Animal Ingredients |
| Tree nuts            |                    |

**Perma-Guard** Diatomaceous earth is not manufactured from genetically modified (GMO) organisms, does not contain genetically modified products and is Kosher certified. **Perma-Guard** Diatomaceous earth products are free of Ractopamine , Dioxin and not tested on animals. No fumigants, preservatives, or fungicides are used in the processing of **Perma-Guard** products.

The Diatomaceous Earth is removed from the deposit using heavy equipment, transported to the milling plant, sifted for debris, milled to a flour like consistency, dried in a low heat stream and bagged then warehoused immediately.

Sincerely,

  
Elyse Barkin, Manager  
Perma-Guard, Inc.
